

Title: Bat Biologist (Technician)

Region: Midwest and Eastern U.S.

Start Date: May 15, 2018

End Date: August 2018 with potential for fall work

Workload: 7 days/week

Pay Rate: Commensurate with experience/education

Description: Apogee, Inc. has openings for bat biologists (technicians) for various presence/absence surveys throughout the Midwest and Eastern U.S. The primary responsibilities of this position are to assist crew-leaders and project managers in conducting summer mist-net and/or acoustic surveys for federally threatened and endangered bats. Daily duties will include assisting crew leaders in all facets of summer surveys including, but not limited to: mist-net deployment and operation, identification of eastern U.S. bat species, application of radio-transmitters and bands, maintaining and decontaminating equipment, radio-telemetry, emergence counts, and collection/submittal of precise and thorough data.

Field work will entail hiking to and from mist-net survey sites with up to 50+ lbs. of equipment in varying terrain and possibly inclement weather at all times of the day. Work vehicle, necessary survey equipment, housing and per diem will be provided.

Qualifications:

- Bachelor's degree or degree in progress in natural resources, wildlife biology, or related field
- Experience handling and identifying bats of the eastern U.S. preferred
- Willingness to travel from project to project during survey season
- Rabies vaccination preferred
- Experience identifying flora of the Eastern U.S. preferred
- Punctuality is a must
- Positive attitude!
